OBJECTIVE

Integrated MSc Software Development & BSc Data Science student with hands-on experience as Graphic Design Co-Lead for Google Developers Group, leading design for 3–5 events with 500+ attendees. Created 5+ book covers for a rising e-book author, increasing their view count by 20–25%. Skilled in Python, UI/UX and Machine Learning, combining creative storytelling with technical expertise to deliver compelling projects, seeking to leverage all my acquired skills in a dynamic environment.

PAST EXPERIENCE & PROJECTS

Freelance Book Cover Designer

Dec 2020 – Dec 2022

Remote

- Designed multiple book covers for an e-book author to maximize reader engagement using Canva, optimizing layout design which **increased viewer count by 20–25%** across all books.
- Collaborated closely with the author by understanding and incorporating their requests, ensuring designs aligned with their vision and received positive feedback.
- Exercised strong attention to detail by catching and correcting errors and meticulously refining elements, which enhanced overall quality and client satisfaction.

OmniBus (University Bus Tracker)

March 2026 – Present

UI/UX Developer & ML Contributor

[GitHub](#)

- Designed and developed the **UI/UX** for a real-time university bus tracking web application using **HTML, CSS, JavaScript, and Leaflet.js** for interactive map rendering with live vehicle tracking and location-based routing.
- Built backend services with **Python Django** and **PostgreSQL** to manage operational status indicators, predictive arrival estimates, and routing data for campus commuters.
- Contributed to training the ML model** for predictive arrival estimates by collecting, cleaning, and labelling transit data, helping reduce perceived wait-time uncertainty for users.

Fake News Detection

Feb 2026 – Present

ML Developer

[GitHub](#)

- Built a **machine learning classifier** in Python to detect fake news articles using **Natural Language Processing (NLP)** techniques including TF-IDF vectorization and text preprocessing with NLTK.
- Trained and evaluated multiple classification models (Logistic Regression, Naive Bayes, SVM) using **scikit-learn**, comparing performance via accuracy, precision, recall, and F1 score.
- Applied data wrangling with **Pandas** and **NumPy** on a labelled news dataset to engineer features and prepare train/test splits for model evaluation.

VOLUNTEERING & LEADERSHIP

Google Developers Group on Campus: Gauhati University

Sep 2025 – Present

Graphic Design Co-Lead

Guwahati, Assam, India (Remote)

- Designed **5 event posters** for technical events and invitations, primarily using Canva while learning Photoshop; applied typographic hierarchy and font choices to improve readability and visual appeal.
- Designed **4 event banners** using Canva, including one printed and displayed at an Ideathon; received praise from event attendees for creativity and impact.
- Developed **4 unique logos** for various events using Adobe Illustrator and Canva; received praise from the Lead Designer and the entire team for creativity and quality.

EDUCATION

Gauhati University <i>Integrated MSc in Software Development</i> • GPA: 8.9/10	Jan 2029 Guwahati
Indian Institute of Technology, Guwahati <i>BSc (Hons.) in Data Science and Artificial Intelligence</i> • GPA: 7.95/10	Jan 2028 Guwahati

SKILLS

Design Tools : Adobe Illustrator (learning), Canva, Photoshop (learning), Figma, Typography, Layout Design
Programming : Python, Java, C, R
Web Technologies : HTML, CSS, JavaScript, Leaflet.js
Backend & Databases : Python, Django, PostgreSQL
ML & Data Science : scikit-learn, NLP (TF-IDF, NLTK), Pandas, NumPy, Data Preprocessing, Model Evaluation
Writing & Content : Creative Writing (Poetry & Fiction), Copywriting, Scriptwriting, Narrative Development, Digital Publishing
Languages : English (Fluent), Assamese (Native), Hindi (Fluent)
