EDUCATION

Gauhati University – Department Of Information Technology
Integrated Masters Of Science in Software Development(4th Sem) | CGPA:8.1/10

Guwahati, Assam
August 2024 - Present

TECHNICAL SKILLS

Languages: Java, Python, C/C++, JavaScript

Databases: My SQL

Developer Tools: Git, GitHub, VS Code, IntelliJ, R Studio, Eclipse.

Analytic Skills: MS Excel, Python, Power BI ,Tableau

AI/ML: PyTorch, Pandas

Software Engineering: SDLC (Agile Methodology)

ACADEMIC & PROJECT EXPERIENCE

Practical Experience

- Engineered responsive, real-world web applications utilizing HTML, CSS, and JavaScript
- Applied Data Structures and Algorithms (DSA) to optimize application logic and solve complex technical challenges
- Expanding expertise in full-stack development methodologies to build end-to-end solutions
- Processed and analyzed datasets to extract actionable insights, leveraging Python for data manipulation and logical problem-solving

Learning & Development

- Deepening expertise in advanced JavaScript architectures and modern backend technologies like Node.js
- Exploring the React ecosystem to strengthen component-based UI design and state management

PROJECTS

ENAJORI (Handloom Website) | HTML , CSS , JS |

- Developed a responsive web platform to digitally showcase **30+** traditional handloom products, blending regional cultural aesthetics with a clean, modern UI design
- Engineered a seamless user experience across all devices, incorporating smooth animations to increase average browsing retention by **20%**
- Integrated direct communication features (WhatsApp, Instagram, Email) for better customer interaction

HALL-ZERO-LIMITS | React.js |

- Developed a modern, responsive web application using **React**, focusing on smooth UI and fast rendering
- Implemented **component-based architecture**, improving code reusability and maintainability
- Designed an interactive user interface with dynamic content rendering and seamless navigation
- Optimized performance using efficient state management and rendering techniques
- Built using modern React practices including reusable components and efficient state handling

IPL-DASHBOARD | Excel, Python ,Power BI |

- Developed an interactive data dashboard to visualize complex match statistics and player performance metrics
- Processed, cleaned, and filtered **20,000+** rows of historical match data utilizing Python and Pandas to ensure high-fidelity accuracy
- Designed an intuitive user interface to present actionable insights, bridging backend data manipulation with frontend presentation

ACHIEVEMENTS

- Successfully completed **Google Cloud Study Jam 2025**, gaining foundational knowledge of cloud computing and Google Cloud services (GDG :Image)
- Completed **Deloitte Data Analytics Job Simulation**, performing real-world data analysis and forensic technology tasks (Deloitte)
