EDUCATION

Gauhati University <i>Integrated M.Sc. in Software Development (5-Year Programme)</i>	Guwahati, Assam 2024 – 2029
Indira Gandhi National Open University <i>Bachelor of Arts in Economics</i>	Remote Ongoing
Sristi Kala Niketan <i>4-Year Diploma in Fine Arts</i>	Guwahati, Assam Completed

TECHNICAL SKILLS

Languages C, C++, C#, Java, Python, Haskell, Fortran, SQL, HTML
Frameworks & Tools ASP.NET Core, Avalonia UI, Podman, PostgreSQL, Git/Github
Design & HCI Figma, Inkscape, Adobe Illustrator, FreeCAD; Accessible UI/UX, WCAG
Concepts Algorithm Design, OOP Design, Functional Programming, Database Architecture, FSM Theory, Discrete Mathematics with Applications in CS

EXPERIENCE

Funked Media <i>Graphics Lead (Part-Time)</i>	Guwahati, Assam Jul 2025 – Sep 2025
- Directed end-to-end visual identity across 10+ client campaigns; established Figma component libraries and brand guidelines, standardising design output for a fast-paced marketing startup. - Coordinated delivery between copywriters and strategists, ensuring pixel-perfect, print- and web-ready outputs on tight deadlines.	
Gauhati University <i>UI/UX Designer — University Academic Software Team</i>	Guwahati, Assam 2025
Applied formal HCI principles to design WCAG-compliant accessible interfaces; iterated on Figma prototypes through structured feedback cycles.	

PROJECTS

OmniBus — Real-Time Bus Tracking Service Python · FastAPI · WebSockets · Redis · PostgreSQL	2025
- Co-architected a ML-based ETA prediction; designed system architecture, designed the UI/UX and authored PRDs for a 3-person team. - Leveraged containerization using, and designed the Database architecture for the system.	
Dasam — Finite State Machine Simulator C# · Avalonia UI	2025
Built a cross-platform FSM simulator with a visual state tracing, real-time state transition logic, and accessibility-first GUI design.	
Fluid Simulation Engine C++ · 2025	
Implemented 2D LBM based, mesoscopic fluid dynamics; optimised memory layout and computation loops for high frame-rate interactive rendering.	
DSL Prototype & Expression Evaluator Haskell · 2024	
Co-Designed a domain-specific language with a custom parser and evaluator using monadic composition and type-safe functional paradigms.	
FSynth — ADSR Audio Synthesizer Fortran · 2024	
Low-level audio engine implementing ADSR envelope modelling and real-time waveform generation with emphasis on numerical precision.	
Xasya — Agricultural Information Platform HTML · CSS · JS · 2024	
Co-developed a responsive, WCAG-compliant web platform for rural communities; optimised for low-bandwidth and multilingual access.	

ADDITIONAL

Mentorship Data Analytics training under Dr. Eshankur Saikia. **Interdisciplinary** Parallel study of Economics (IGNOU) alongside CS — applicable to algorithmic economics and policy-tech research. **Fine Arts** 4-year formal training informing systems design, visual communication, and HCI work.
